

Telindus and Billit are collaborating to ensure electronic billing via Peppol in Gesall solutions.

LUXEMBOURG – April 20th, 2023 – Following the introduction of the new law on electronic invoicing via Peppol, Telindus officially announces its collaboration with Billit to offer a complete electronic invoicing service to its customers.

Since mid-March, electronic invoicing via Peppol (Pan-European Public Procurement Online) is mandatory for companies working with Luxembourgish public entities. This platform - which promotes the dematerialisation of trade and improves the efficiency of public procurement - aims to enable companies to supply goods and services across Europe, whatever the sector of activity. Following these new guidelines, Telindus has decided to collaborate with Billit, a global player in the field of electronic invoicing and Peppol solutions, in order to meet market and customer needs. Thanks to its certified access points, Billit allows automated routing of invoices issued from Gesall.Net to Luxembourgish public administrations.

“The partnership with Telindus is in line with Billit's mission to make e-invoicing the standard for invoicing in Europe. Thanks to collaborations with partners such as Telindus, Billit strengthens its position on the European market and brings reliable and affordable Peppol solutions to entrepreneurs in Luxembourg.” Luc Bourdeaud’hui, Business Development Manager, Billit.

It is important for Telindus’ experts to collaborate with a trusted partner specialized in electronic invoicing and to support its customers in migrating to electronic invoicing via Peppol.

“This new partnership guarantees that invoices are sent electronically from its billing software via the Peppol network and thus provides an end-to-end service between the issuer and the invoice receiver. It is also part of the CSR strategy of Telindus - and its customers - to dematerialize as many documents as possible, including invoices.” Jean Calçada, Head of Apsal & Gesall department, Telindus.
